

Farming and Wildlife

What do farmers do?

Farmers grow food

Farmers also care for the countryside

There are
lots of
habitats on
farms

Hedgerows and walls

The edges of fields

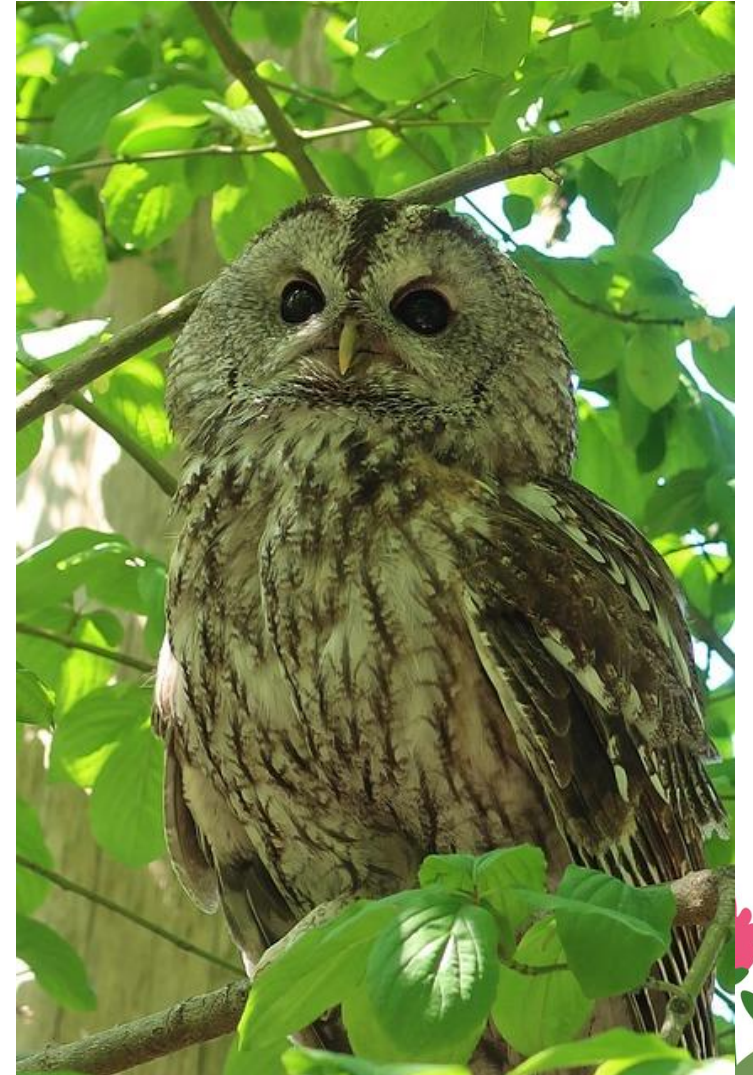

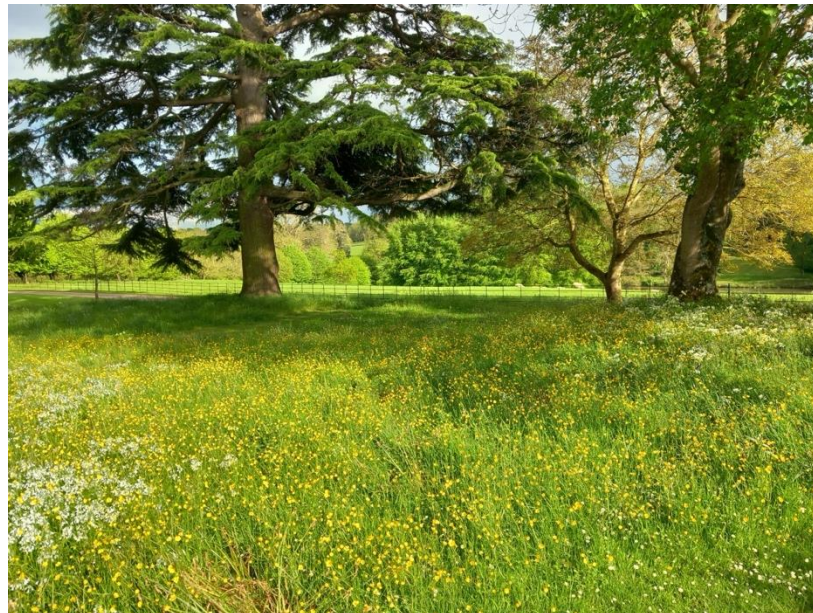

Wet areas and ponds

Trees and woodlands

Grazing land and meadows

Areas created especially for wildlife

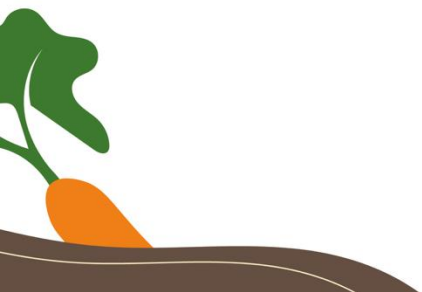

Grass margins around crops

Pollen and nectar areas

Beetle banks in crops

Design your wildlife friendly school

Remember it is a good idea to:

Conserve the features you already have

Connect wildlife areas by making “wildlife corridors”

Create new areas for wildlife

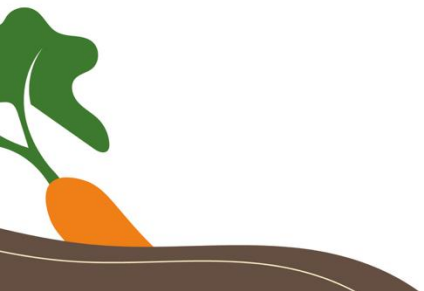

Some suggestions

Create new habitats

**And don't
forget to
make places
to sit and
enjoy the
wildlife**
